

3 G Jammer

The 3G Jammer is a new portable system that blocks any operation of 3G standards within the 2100 MHz to 2,200 MHz operational frequency bands. This jammer is intended for use by security personnel responsible for protecting VIPs against acts of terrorism which use radio controlled explosive devices. The 3G jammer has no external antennas and is contained in a standard attaché - case. The system has a built in battery pack facilitating autonomous operation and an external AC/DC charger (220V 50 Hz mains) is included. The jammer is very simple to operate and maintain, does not require any operator adjustments and is ready for immediate use when the power is switched on.

Technical Specification:

Frequency range	2100-2200 mHz
Minimum control area	50 meters
Operational time on full battery	120 minutes
WeiQht	10 kQ
Dimensions	460 x 400 x140

Goldman only distributes equipment, which is manufactured to our exact standards and uses the highest quality components and latest technologies available. For your guarantee of quality assurance each piece is individually burned in and thoroughly tested before leaving our facilities.

1. Style, color and product type subject to change
2. See terms and conditions for full warranty details
