

## Bomb Jammer 20MHz- 500 MHz (3011-0020-0500)

The 3011-0020-0500 Bomb Jammer protects VIPs from acts of terrorism when explosive devices with radio controlled fuses are used that transmit in the 20 - 500

MHz range. This transportable jammer can be easily used by security service personnel. The system operates by emitting a series of special signals within the radio frequency bands used for operation of home-made or manufactured industrial radio controlled fuses.

The Bomb Jammer ensures the blocking of remotely activated devices that are controlled by a coded radio signals in the 20 to 500 MHz frequency band.

The

3011- 0020 - 0500 has no external antennas and is conveniently contained in a standard attaché - case for portability. The Bomb Jammer also has a built-in battery that ensures its autonomous operation and includes an external AC/DC charger. The system is very simple in operation and maintenance, and does not require any operator adjustments. It is ready for operation immediately when the power is switched on.

### Specification:

Frequency range		20-500 mHz
Minimum control area		50 meters
Operational time on full battery		80 minutes
Weight		10 kg
Dimensions		460 x 240 x345

Goldman only distributes equipment, which is manufactured to our exacting standards and uses the highest quality components and latest technologies available. For your guarantee of quality assurance each piece is individually burned in and thoroughly tested before leaving our facilities.

1. Style, color and product type subject to change
2. See terms and conditions for full warranty details.
