

## **Bomb Jammer 500MHz- 2000 MHz (3011-0200-2000)**

The 3011-0200-2000 Bomb Jammer is a new portable system that blocks any operation of radio controlled fuses, cellular phones in the GSM 900 band, AMPS/DAMPS, CDMA, GSM 1800, GSM 1900 standards, and wireless phones within the 500 MHz to 2,000 MHz operational frequency bands. This jammer is intended for use by security personnel responsible for protecting VIPs against acts of terrorism which use radio controlled explosive devices. The 3011-0200-2000 has no external antennas and is contained in a standard attaché - case. The system has a built in battery pack facilitating autonomous operation and an external AC/DC charger (220V 50 Hz mains) is included. The jammer is very simple to operate and maintain, does not require any operator adjustments and is ready for immediate use when the power is switched on.

### **Technical Specifications:**

|                                  |  |                |
|----------------------------------|--|----------------|
| Frequency range                  |  | 20-2000 mHz    |
| Minimum control area             |  | 50 meters      |
| Operational time on full battery |  | 120 minutes    |
| Weight                           |  | 10 kg          |
| Dimensions                       |  | 460 x 400 x140 |

Goldman only distributes equipment, which is manufactured to our exacting standards and uses the highest quality components and latest technologies available. For your guarantee of quality assurance each piece is individually burned in and thoroughly tested before leaving our facilities.

1. Style, color and product type subject to change
2. See terms and conditions for full warranty details
